EXECUTION

HANDOVER

Consulting

Ticitech Medical Solutions is one of the leading Imaging technology consulting, services, and business process outsourcing organization that envisioned and pioneered the adoption of the flexible global business practices that today enable our partners to operate more efficiently.

To help healthcare organizations, facing a more and more complex environment, Ticitech Medical Solutions has designed new very innovating audit and consulting services for customers. Services, which bring quality, cost reduction or capacity solutions in order to optimize their machine or department patient flow and organization.

Our consultants, who are radiologists and Imaging technicians with vast medical and technical experience, discuss and analyse the requirements of our clients to offer a realistic technical and cost effective financial proposal for the execution of projects.

FINANCING

Generating money for high investment projects like diagnostic imaging clinic or a radiology department within the hospital is not an easy task.

- With our vast experience in this industry we know that generating money for high investment projects like standalone diagnostic imaging clinic or a radiology section within the hospital is not an easy task.
- We offer complete financing package to our clients. If you are credit worthy, then we have a solution for you!
- We offer financing for a single machine setup, small clinics with multiple machine setup and for full range diagnostic imaging clinic.
- We also have options where we can partner with you to either setup a full range diagnostic imaging facility or to explore expansion possibilities for your existing setup.

Planning

We have a wide experience in full turnkey projects, including site inspection, installation, de-installation, crating, insurance and transport around the world. With our qualified and experienced team of project managers, "Ticitech Medical Solutions" is able to offer complete project management.

Our entire project management package includes:

- Site inspections
- Forecasting precisely the project budget and duration.
- Project drawings and site preparations for the chosen product.
- Look for the professional and cost effective resources to execute the project.
- Establishing the initial contacts with all the suppliers involved in the project.
- Co-ordinating and optimizing all phases of the project with various suppliers.
- Handling over of protocols at the successful execution of the project.

Execution

Execution is the most important phase of project. It must strictly follow what has been planned and how it has been planned. Right from laying the first foundation to handing over the project to client, the flow has to be flawless.

Our term of Project managers, Engineers, Technicians and Application specialists are qualified and experienced to handle a flawless execution.

Handover

Handover is the most important part of a project. Handing over includes various levels of training like Application, Technical and Process trainings. Entire staff is adequately trained in their respective divisions and once we see that the institute staff can ably handle the institute then we handover the institute to its owner.

TICITECH **MEDMARKET**

Top Quality Imaging Equipment

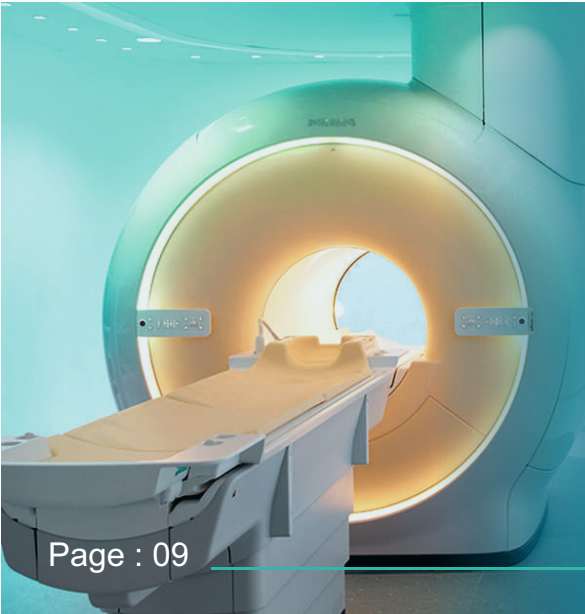

Used Imaging Equipment

Ticitech Medical Solutions is one of the leading re-marketer/re-seller of used diagnostic medical imaging equipment such as MRI Scanners, CT Scanners, RAD/RF Rooms, C-Arms, Cath Labs, Mammography, Nuclear Medicine, Bone Densitometers, Ultrasound, Computer radiology and Printers and all accessory items used within the radiology industry.

Ticitech Medical Solution purchases used equipment directly from clinics, hospitals, private physicians and imaging centers without involving any third party like agents or other used equipment dealers. This ensures that our prices are realistic and that our customers benefit when they purchase from us.

Our stringent QA process ensures that the equipment being procured by us is fully functional and meets OEM quality standards for functionality.

We sell used equipment (reconditioned or non-reconditioned) to imaging equipment dealers, imaging centers and large hospitals in Europe, US, Asia, Australia, Russia, and the Middle East.

New Imaging Equipment

Ticitech Medical Solutions deals in the sale of brand-new diagnostic imaging equipment and parts. We work in harmony with various manufacturers and OEM's to give best possible solutions to our clients.

We not only sell imaging equipment and parts from these manufacturers and OEM's but also provide services related to these imaging equipment.

Our team of well qualified and experienced project managers, radiology technicians and application personnel are capable of handling tasks such as installation, dismantling, servicing, application training and repair of these imaging equipment and their parts.

Please visit "Our Services" section and "Radiology@Ticitech" section to know more about our premium services.

Spare Parts and Accessories

Ticitech Medical Solutions understands the real problems of the users of diagnostic medical equipment. The increasing cost of services and parts is breaking the backbone of real consumers. We work in harmony with the OEM's to offer solutions for the day to day problems of the consumers. We provide original spare parts at competitive price to our customers. There parts supplied are tested and are covered by a limited time warranty. Parts supplied by us are sold as new, used and refurbished.

We also supply accessories for various modalities in diagnostic medical imaging. Accessories like Injectors for CT and MRI, Contract Syringes, Lead glasses, X-Ray Shielding, Ceiling mounts for monitors and much more.

Contact us to know more about our product range or let us know what you want and we will provide you a solution.

Re-Conditioning

We have expertise in re-conditioning used medical equipment. With our in house facility of re-conditioning used Imaging equipment we ensure that proper procedures are being followed and quality parts are being used while re-conditioning the equipment.

Our QA team checks these equipment for quality assurance and assures that the re-conditioned equipment is free of defects and is as per quality standards.

Our re-conditioned equipment are guaranteed against DOA and also come with other warranties where ever applicable.

Assets Management

Ticitech Medical Solutions also deals in asset recovery within the Medical Equipment market. We have long experience working directly with the industry's leading OEMs with the disposition of used, re-conditioned, obsolete, and off lease equipment. We have the ability to aggregate product in multiple locations worldwide and manage logistics to save time and ensure maximum ROI for our vendors.

Our staff is comprised of highly qualified professionals who are always up to date with the ever-changing technology within the medical Imaging field.

Our customers are experienced industry leaders and we have developed strong business relationships with few of the worlds leading VAR's, Re-Marketers, and End User Clientele to ensure discrete redeployment of your equipment into the secondary market.

TICITECH MEDMOVERS

Professional Medical Logistics

Removals & Installations

Ticitech Medical Solutions has a team of qualified professionals who are experienced in dismantling a wide range of medical imaging equipment and are daily on the move to provide these services to its clients.

Whether dismantling the system for storage, resale or for parts we follow a strict process which assures that extreme care is taken to avoid any of damage to the equipment. All the parts are individually packed and labeled so that re-assembling them is a quick and easy process.

We document the whole packaging process and take images of each package and also ask our customers to make a thorough inspection of the dismantled equipment before transportation. This adds to satisfaction and provides sense of security.

Packaging

We have teamed up with one of the most professional packaging company in Switzerland to pack the medical equipment we sell to our clients.

Our joint team is highly qualified and experienced to handle medical equipment packaging. Our packaging standards are very high and exceed industry parameters set for packaging of medical equipment. We keep laws and rules of destination country in mind while packing the equipment so that our clients do not face clearance issues.

We take special care of fumigation of wood and container, corrosion protection of equipment, packing of fragile items especially digital detectors which are highly susceptible to damage due to environment condition.

We ensure our customers that when they buy from us then their equipment is in gentle yet highly professional hands.

We offer a global network of logistics for installation, dismantling, packaging and transportation of medical imaging equipment.

We secure our clients by providing insurance packages of upto USD 5 million, when the machines are dismantled, transported by us in any part of the world.

We have warehouses around the world. We have packages offering storage facility for the equipment along with insurance cover. This way we secure the investment of our client against natural disaster, human negligence, and theft.

Warehousing

Ticitech Medical Solutions has tied up with various transportation companies around Europe to store the equipment which it removes from clinic and hospitals. Diagnostic medical imaging equipment need specialized handling and packaging and to accomplish this we have trained staff which follow standard protocols to remove, store, transport and pack medical imaging equipment.

TICITECH MEDCENTRES

High Quality Diagnosis and Education

A background image showing a close-up of a doctor's hand holding a teal stethoscope against a white lab coat. The doctor is wearing blue scrubs underneath. The image is slightly blurred, focusing on the stethoscope and the doctor's hand.

RADIOLOGY CENTERS

Ticitech Medical Solutions has a vast experience in setting up, running and managing diagnostic imaging clinics. Our clinics are bright and spacious and offer full spectrum of radiology services which include CT, MRI, DR, Mammography, Bone Densitometry and Ultrasound. Our standards are very high, our staff is highly qualified and experienced, and our equipment is very high-end resulting in precise and accurate diagnosis with utmost patient care.

In addition to high standards of diagnosis, we also offer the option of interventional pain therapy (according to the Swiss Society of Interventional Pain Management, www.ssipm.ch) with infiltrations in the area of the entire spine (including the cervical spine) and the peripheral joints.

EDUCATION & TRAINING

Ticitech Medical Solutions is imparting specialized courses in Radiology. Our courses have a balance of theoretical and practical training.

We also provide customized courses on special request to corporates, hospitals and imaging technicians.

If you are interested in getting yourself or your staff trained, then please email us at ticitech@ticitech.ch and our customer care team will be in touch with you.
